PROFILE

Results-driven Computer Science undergraduate with a strong interest in Project Management and Software Development processes. Skilled in project coordination, stakeholder communication, requirement gathering, and documentation. Experienced in Agile & Scrum practices, SDLC processes, task tracking, and supporting team-based projects to ensure timely and quality delivery. Possesses strong analytical, problem solving, communication, and leadership skills, with the ability to effectively align project goals with business and technical requirements.

EDUCATION

Bachelor of Computer Science (Undergraduate)

University of Ruhuna

2023 – Present

Matara, Sri Lanka

GCE Advanced Level - Mathematics stream

Kegalu Vidyalaya

2021

PROJECT EXPERIENCE

Personal Healthcare Monitoring System (Healthify) 🔗

Group Project

- Healthify is a web-based personal healthcare monitoring platform designed to securely manage medical records, track health data, and connect patients with doctors in a single system.
- Developed using React.js, Tailwind CSS, Java / Spring Boot, and MySQL to deliver a secure and responsive full-stack web application.
- Contributed to requirements gathering and analysis by identifying system needs and supporting the design of user workflows and functional requirements.
- Assisted in Agile project coordination through sprint planning, backlog refinement, and progress tracking using Trello.
- Participated in User Acceptance Testing (UAT) and system validation to ensure the platform met business requirements and quality standards.

Police Information Management System 🔗

Group Project

- A Police Information Management System is a centralized platform for managing law enforcement records, firearm requests, reports, and data entry.
- Developed using C# and the .NET Framework to build a robust and efficient desktop application with a focus on performance, usability, and maintainable architecture.
- Assisted in requirements gathering, analysis, and documentation to support stakeholder alignment.
- Supported Agile project activities, including planning, task tracking, and team coordination.

Smart Attendance Tracking System 🔗

Individual Project

- A smart attendance tracking system that automates attendance management using facial recognition technology.
- Developed using React.js, Tailwind CSS, Python Face API, and MongoDB.
- Implemented facial recognition features for accurate and automated attendance tracking.
- Designed responsive and user-friendly interfaces for efficient attendance management.
- Integrated secure data storage and management functionalities using MongoDB.

Text-to-Speech Converter 🔗

Individual Project

- A web-based tool that converts text into natural-sounding speech, enhancing accessibility and providing an interactive user experience.
- Developed web applications using HTML, CSS, and JavaScript, ensuring cross-browser compatibility.
- Implemented real-time voice synthesis with Web Speech API to enhance accessibility and interactivity.
- Designed responsive and user-friendly interfaces following UI/UX best practices.

TECHNICAL SKILLS

Programming Languages

Java, C, JavaScript, PHP

Technologies

React.js, Next.js, Tailwind CSS, Node.js

Databases

MySQL, MongoDB

Tools & Platforms

Trello, Jira, GitHub, Figma, Microsoft Office Suite

Methodologies

Agile, Scrum, SDLC
